PERFUME TRADITION CONSTANTLY RENEWED BY RESEARCH

PRECIOUS BOTTLE DECORATED BY HAND

AN EXCITING EXPERIENCE IN ALL RESPECTS, SIGHT, TOUCH, SMELL... AND CONQUEST

ABOUT US

Paolo Gigli Profumi was established in 1950; its products are distributed through the brand GPROFUMI.

A tradition of culture and exquisite craftsmanship, handed over and enshrined as the most precious family heritage.

ABOUT US

Florentz

The Company's headquarters are in Florence, the heart of Tuscany, the cradle of art and beauty, birthplace for artists such as Michelangelo, Raffaello, Cellini, Botticelli, Leonardo and many many more.

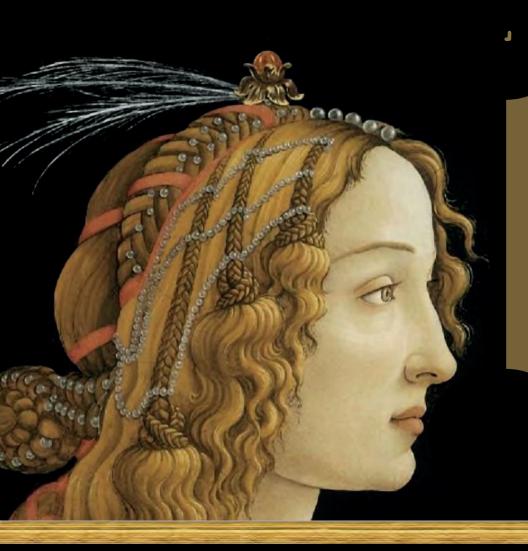

A STORY OF CRAFTSMANSHIP AND BEAUTY

The lingering smell of iris fields in the Chianti area; the sharp olfactory sensation stimulated by the Maremma, closed between the mountain and the sea; the warm scent of leather manufacturing, when leather is first soaked and then bated to make it malleable for the hand of the craftsman; the heady and rich scent of the oil mill when olives are just pressed; and the bubbling wave of slowly fermenting must: those olfactory tastes have inspired the perfume masters of Tuscan workshops already at work in 1200.

AGENCHALL SPECIAL SPEC

A STORY OF CRAFTSMANSHIP AND BEAUTY

Catherine de' Medici,
in her constant search for beauty
and quality,
a lover of perfumes and jewels,
for their refined work
rather than stone value,
on becoming Queen of France
took with her a perfume
created in these workshops and called
"Acqua della Reina",
thus paving the way for
the perfumery fortune
of France.

A STORY OF CRAFTSMANSHIP AND BEAUTY

At that time
Florence lived with its craftsmen at work actually in the streets,
and workshops were completely open.
Carpenters, tanners, smiths and lots of apothecaries:
their noises and smells invaded the city.

A STORY OF CRAFTSMANSHIP AND BEAUTY

The typically Florentine thirst for beauty, and his having lived in this city ever since he was a child stimulated a young Nello Gigli (Paolo's father) to rediscover those old tastes as soon as the tragedy of the War was over, as message of trust and hope for life.

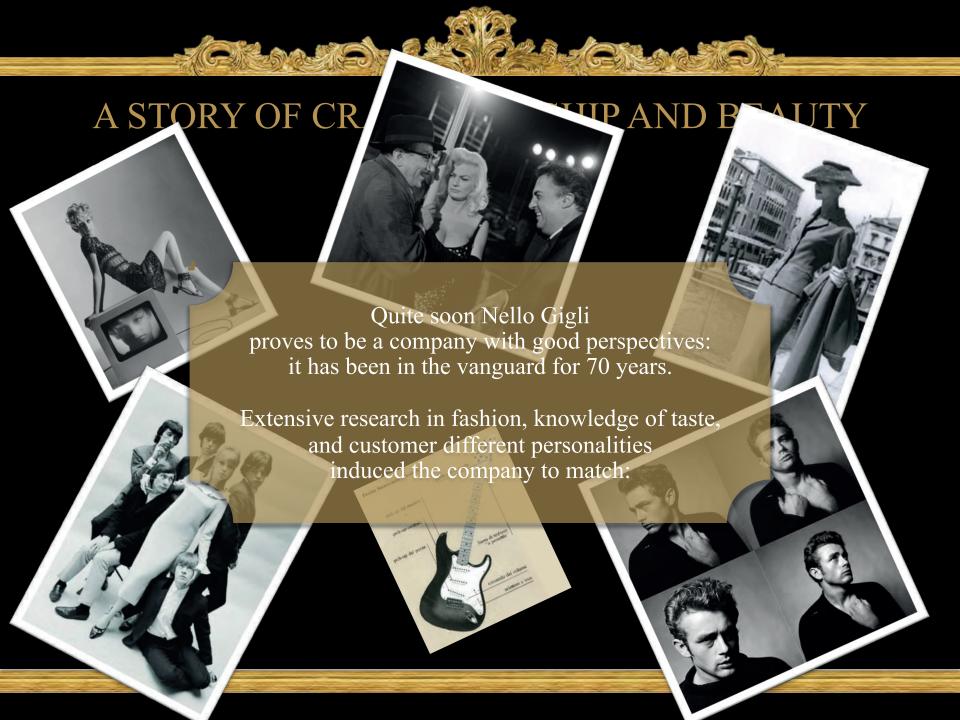

This vocation led him to broaden his knowledge of fragrances and olfactory combinations, to find the atmospheres of the past.

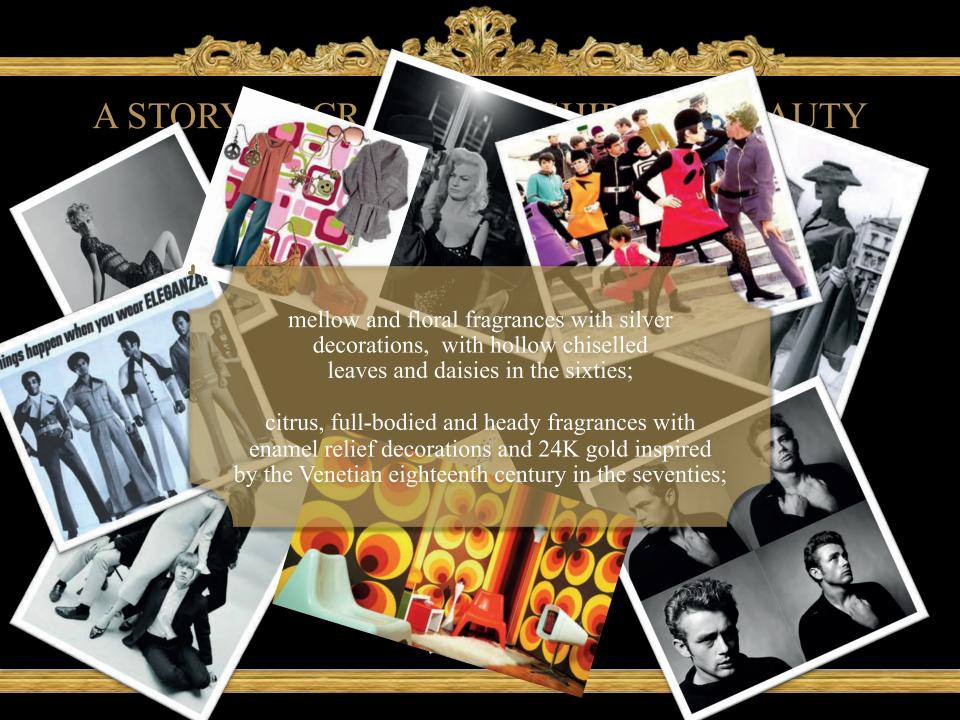

As a good craftsman, he thought about how to enclose them, embellishing them with the tradition of Florentine finished work.

Thus his elegant bottles were born, full of refined decorations, handmade, with gold drawings or ornaments.

Precious jewels inside valuable walnut cases making the perfumes conceived by young Nello always unique.

Perfumes, of course,
real distillates of emotions
calling up memories,
play with the unconscious
and donate relax, joy and well-being.

It is important for them to be persistent; for this reason, Paolo Gigli produces just *eau de parfum* with 15% of essence.

Every customer chooses her/his fragrance depending on exclusive needs to feel fine, abreast of the times, and to leave a discreet, heady wake.

BOTTLE MANUFACTURING

The bottles are manufactured through an old as well as immortal and unique technique called *three-firing process*, securing perfect adhesion of glass and decorations.

All our products, jewels of Florentine craftsmanship, have been decorated by hand by master craftsmen for 70 years, through a manufacturing technique requiring great skill and a long time.

Bottles are decorated exclusively by hand, always by means of mink hair brushes.

BOTTLE MANUFACTURING

The manufacturing goes from firing of enamels and 24k liquid gold put on glass to a second decoration stage to obtain relief effects.

It is a crucial stage needing great experience and extraordinary art skills; firing in special stoves at 550°C to get the result wished for.

For those reasons every product of ours is unique, and just a natural walnut luxury case may contain it.
